JAYDIP DABHI

FULLSTACK DEVELOPER

PROFILE

I am seeking greater responsibility where I can expand my knowledge and apply my logical skills to solve complex problems in the field of software engineering. In my current role, I have implemented a society management system and resolved several complex issues within the project.

WORK EXPERIENCE

Bharti Soft Tech Pvt Ltd

May 2024-Current

FullStack Developer

- Using PHP and Laravel to create and manage web apps with an emphasis on database design, backend logic, and API interaction. complied with best security principles, enhanced performance, and added authentication.
- Agile workflows and worked with front-end developers to produce responsive user interfaces. participated in code reviews to improve team productivity and wrote unit tests to guarantee code quality.

PROJECTS

khana Khazana-Website

Jun 2024- Oct 2024

- I developed the Khana Khazana website using HTML, CSS, and JavaScript. The site presents a collection of delicious recipes with an attractive and responsive layout.
- This project showcases my front-end development skills and passion for building functional, visually appealing websites.

COLOR BOOK Library (Final Year Project)

Nov 2024- Oct 2025

- In this project my position is Team Member . I am Backend Developer using PHP Laravel framework to store the data in MySql Database .
- I developed the COLOR BOOK Library website, handling both frontend and backend using PHP and Laravel. The site allows users to browse, search, and manage a collection of books efficiently. I implemented user authentication, dynamic content management, and a responsive design to ensure a seamless and engaging user experience.
